

**NEW**

# VSM KP712 Compactgrain self-sharpening High-Tech product

- Consistent grinding performance and surface brightness
- Consistent surface finish
- Very long service life
- Easy to use

# VSM KP712 Compactgrain for flat grinding

VSM “NEW” Compactgrain on paper backing are the abrasives for continuous grinding operations. Due to their consistent grinding performance they achieve consistent surface finish and surface brightness throughout their long service life. This product is especially designed for polishing stainless steel sheets and parts on wide belt machines or stroke grinders.

## Consistent grinding performance, surface brightness and surface finish

– due to continuous creation of new cutting edges

## Long abrasive belt life = less frequent changing of abrasive belts

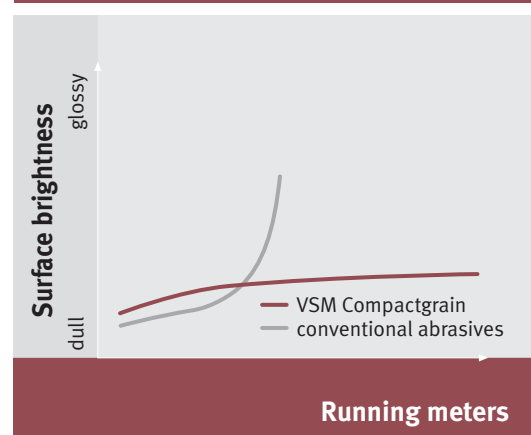

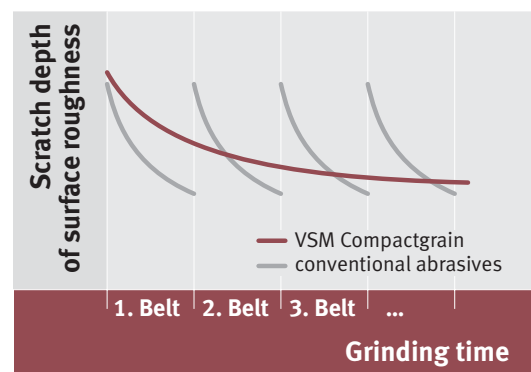

– as a result of the superior combined effect of a sturdy paper backing and high reserve of unique long life property abrasives of the self-sharpening Compactgrain

## Easy to use

– due to the very good and even adhesion of grain to the backing material

Technical data	
<b>Grain type:</b>	Aluminium oxide
<b>Grit size:</b>	120, 180, 240, 320, 400
<b>Backing material:</b>	E-Paper
<b>Bonding:</b>	Full resin-bonded with grinding additives
<b>Manufact. width:</b>	1,480 mm

Recommended applications	
<b>Material:</b>	Stainless steel, carbon steel, chrome-nickel-alloys, titanium alloys etc.
<b>Grinding process:</b>	Flat grinding
<b>Workpiece:</b>	Sheets, coils, slabs, containers, stamped parts, fabrications
<b>Processing:</b>	Segmented wide belts, wide belts, discs and long belts
